

Vikoma Ancillary Equipment

innovation
quality
reliability

Vikoma provides a full range of ancillary equipment including dispersants and sorbents.

The range includes Vikoma's Octopus pressure washer, suited to a wide variety of cleaning situations. Smaller spray systems, pressure washers and power carriers are also available. Vikoma can also supply diesel driven generators, mobile high powered skylights and incinerators to assist in emergency response and clean up operations.

Vikoma Power Carrier

The Vikoma Power Carrier is ideal for transporting Vikoma equipment, and is especially useful for access to areas that cannot be reached by road. The carrier can be kitted out with lifting apparatus, which can be customised to suit Vikoma equipment.

- Ideal for transporting equipment, especially in areas which are difficult to reach by road.
- Ideal for transporting modular equipment such as the MiniVac, Mini Pipeline systems and transfer pumps.

Octopus Pressure Washer

Designed for washing down and cleaning of response equipment after use in an oil spill situation. Also suitable for general purpose cleaning applications.

- For general purpose cleaning operations.
- Also ideal for washing down and cleaning of response equipment after use in a spill.

Vikoma Skylight System

The Vikoma Skylight System is a 9 metre (29 feet) high, mobile lighting tower which is very quiet and ideally suited for outside use.

- Compact 10m high floodlighting tower system.
- 4 x 1000 watt floodlights.
- Generator.
- Mounted on wheeled trailer for easy transportation.

PD4000 Genset

The PD4000 is a skid frame mounted diesel generator capable of producing 4Kva. With dual 230/100-130V, the generator is suitable for powering ancillary equipment such as lighting sets. The unit is fitted with a spark arrestor for use in gaseous environment.

PD3000 Genset

The PD3000 is a skid frame mounted diesel generator capable of producing 2.6Kva. With dual 230/115V, the generator is suitable for powering ancillary equipment such as lighting sets. The unit is fitted with an air heater for starting in low temperatures, and a spark arrestor for use in gaseous environment.

Vikoma can also provide a range of other ancillary equipment including:

- Incinerators
- Sorbents
- Sorbent wringers
- Stillages
- Pressure washers
- Dispersant supplies
- PPE equipment
- Lifting and handling equipment
