We offer a full range of equipment to contain, recover and store oil from a spill. Systems can be supplied in convenient containers which can be customised to meet your requirements. These containers keep equipment safe and protected from the weather and can be quickly transported to the spill location or kept on the dockside or ship ready for action.

### Equipment accessibility

When the containers are stored on a vessel it is important to consider how you will access the equipment. We provide custom made storage and easy handling solutions to allow for safe and easy access to the equipment.

### Vikoma can offer:

- Containers or trailers for booms, skimmers, storage tanks, beach cleaning
- Tier one containerised packages
- Custom built aluminium
- Working with you to meet your requirements

### Benefits

- Compact custom designs
- Preserves working life of the equipment
- Include company branding

### Specification

- ISO or Offshore certification available
- CSC plating and certification
