## Our mid-size oil recovery skimmer for continuous use in hazardous and corrosive environments

- Vikoma manufactures a range of highly efficient skimmers designed specifically for industrial applications
- Units are built of high grade stainless steel to withstand harsh industrial environments. Vikoma produce a range of skimmers, both free floating and fixed units to deal with a range of scenarios and skimming capabilities
- Also available in higher specification exotic materials for more aggressive environments

The Midi disc oil recovery skimmer is designed for continuous use in both hazardous and corrosive environments. We can provide systems with certification for use in hazardous areas.

The skimmer will remove a wide range of floating oils at a maximum recovery rate of up to 9m<sup>3</sup>/hr with a typical free water content of only 2%.

The skimmer can be supplied either in a floating version for where water levels may vary significantly or a fixed version for where the water level is fixed such as an API separator. It is fitted with an on-board positive displacement

rotary lobe oil transfer pump that is automatically operated by a float switch.

The standard model is manufactured from 316 grade stainless steel and is fitted with carbon filled PTFE scrapers. Other material options such as Super Duplex and 6Mo stainless steel are also available.

The skimmer is powered by an electro-hydraulic or pneumatic powerpack unit and can operate continuously, unattended with minimal maintenance.

Capacity
Up to 9m <sup>3</sup> per hour
System components
Skimmer head Powerpack unit Hose set Lifting sling
Optional extras
Mooring lines Spares kits Deflector booms
