Vikoflex Boom

VIKOMA

Protecting our environment over 50 years

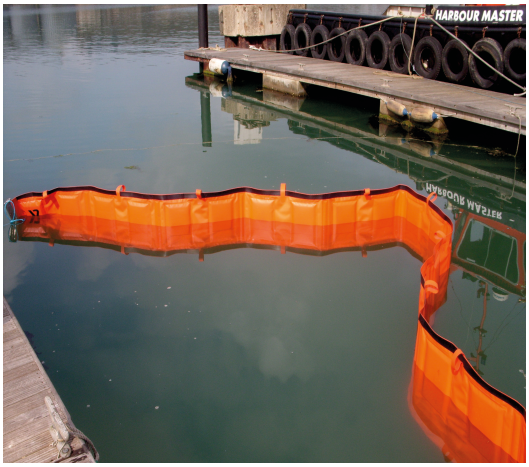

A curtain boom with foam buoyancy for oil spill response or permanent installation

- A simple, effective fence boom to provide a fast, cost effective solution.
- A light and flexible boom
- Rapid deployment without the need for any special ancillary equipment
- Built in buoyancy chambers

Vikoflex Boom is a curtain boom with internal foam buoyancy. It is suitable for oil spill response or for permanent installation, it is robust, easy to deploy and is suitable for calm protected waters. It is resistant to sunlight, hydrocarbons and rough treatment while being durable and easy to clean.

Vikoflex Boom is designed for use in calm water environments such as rivers, intakes, harbours and nearshore applications. The boom is available in various sizes to suit the customer's needs.

Vikoflex Boom is constructed of high grade polyurethane or neoprene, with foam floatation and vertical fibreglass stiffeners. The boom is manufactured in 5m - 25m sections which can be connected with steel U bolts, Unicon or ASTM connectors on request.

For easy handling Vikoflex Boom is fitted with handles and quick couplings at the top and bottom edges providing attachment points for use with external tension lines for use in higher currents.

The boom can be supplied in aluminium crates for compact storage, which can be stacked one on top of the other.
Vikoflex Boom can be deployed direct from the crate, or from a reel.

Materials

Polyurethane:
Polyurethane construction provides good performance and durability while offering a cost effective boom.

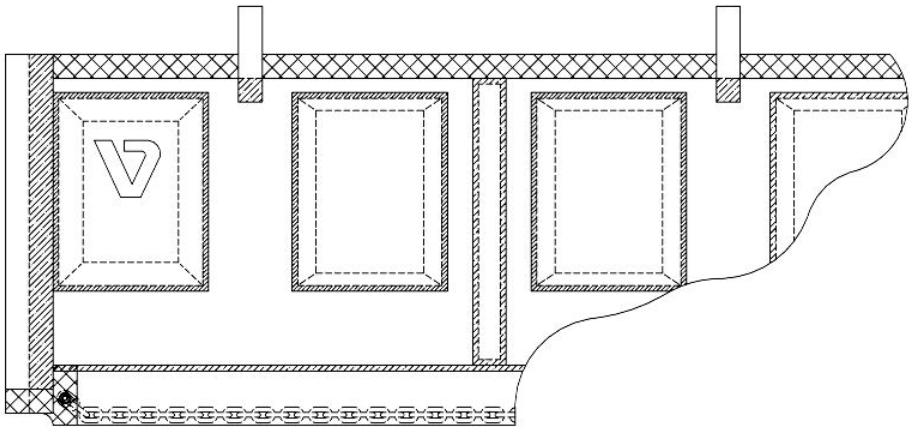

Neoprene:
Neoprene construction offers increased durability and performs well in extremes of temperature being operational from -40˚C to +90˚C.

Sizes Available:
Vikoflex Boom is available in sizes 350mm to 1100mm (13.78" to 43.3") and is available in 5m - 25m sections.

Product Benefits:
- Simple and fast to deploy and recover
- Strong flexible boom
- Easy to clean
